

CITY OF WHITEFISH

EAST 6TH STREET RECONSTRUCTION PROJECT

PROJECT NEWSLETTER #1

SEPTEMBER 2024

PUBLIC MEETING – SEPTEMBER 25th, 2024 – CITY HALL – 6:00 PM

Project Background

East 6th Street is a primary route to and from the Whitefish High School and Muldown Elementary School. With the recent reconstruction of Muldown, East 6th Street has seen a considerable increase in traffic, which the roadway is not equipped to safely manage. Due to these traffic challenges combined with the street's current inadequate means of providing safe pedestrian/bicycle paths and snow removal options, the City has deemed East 6th Street a priority for re-design.

Project Overview

The City of Whitefish is planning to reconstruct East 6th Street, from Spokane Avenue to Pine Avenue, with additional sidewalk upgrades along Pine Avenue from East 5th Street to East 7th Street. The reconstruction project will involve the design and construction of approximately 1,780 feet of roadway and path design along East 6th Street and approximately 800 feet of path along Pine Avenue. The City has selected HDR Engineering, Inc. to complete the civil engineering and assist the City with project management, public involvement,

surveying and geotechnical services. In addition to the roadway and path improvements, select utilities and drainages along the project path will also be improved along with decorative street lighting.

Public Outreach & Involvement

Please refer to the following link as the best source for information regarding this project. Additional communications and outreach campaigns will be ongoing throughout the project that will allow ample opportunity for public involvement. To streamline communication efforts with all property owners and residents within the project vicinity, please provide your name, email address, and property address to Zachary.Maassen@hdrinc.com or call #406-203-2451.

Questionnaire

If your property is located in the project corridor, you will also have a questionnaire included with this newsletter. Please complete and return the questionnaire by October 4th to Zachary Maassen with HDR. Responses can be emailed or mailed to the following address:

Attn: Zachary Maassen
HDR Engineering, Inc.
220 S. Complex Dr
Suite 109
Kalispell, MT 59901

Responses from this questionnaire will be kept confidential and only used by the design team to obtain general project feedback and ensure that resident's have the opportunity to express any concerns they may have.
