PUBLIC SERVICE ANNOUNCEMENT

May 9, 2025

Traffic Advisory – Baker Avenue Viaduct Construction Update:

RAZZ Construction, Inc. began work on the **Baker Avenue Viaduct Project** earlier this week. This important project includes improvements to the viaduct and surrounding roads, including **Edgewood Place** and **Railway Street**. Work will generally take place **Monday through Friday, from 7:00 AM to 7:30 PM**, as needed to stay on schedule.

From **May 12th through June 30th**, there will be **intermittent traffic delays** on the Baker Avenue Viaduct. In order to safely move traffic barriers and complete necessary phases of construction, **evening work and alternating two-way traffic patterns** may be required for short periods.

We appreciate your patience as we work to make **long-term improvements** for pedestrians, cyclists, and drivers alike. Key upgrades include:

- **Widened pedestrian and bicycle lanes** (10 feet wide on each side of the bridge)
- Relocation of existing traffic barriers
- Installation of new curbs
- Intersection enhancements at Railway Street and Baker Avenue
- **Upgraded lighting (10 new luminaires)**
- **Landscaping and irrigation improvements** on all four bridge corners

Our team is committed to minimizing disruptions and maintaining safe access throughout construction. We thank the community for your understanding and support as we improve the safety and experience for all who travel through this corridor.

For questions or updates, please contact City of Whitefish Public Works.
